

Dear Marie-Louise,

Here is my proposal:

I am a teacher at Gawler & District College and a local resident. I would like to speak with you about an idea I have had regarding the triangular pieces of land on First St and Anne Lane and on Adelaide Rd and First St. For about 4 years now, I have wanted to beautify these pieces of land as I feel that they are currently wasted as it serves no public amenity. Therefore, I have started making enquiries about applying for a Community Grant from the Town of Gawler. The work will be conducted using staff, students and community volunteers I can see that doing this would add some appeal to Gawler, benefiting residents, pedestrians, visitors and local businesses, as there would be a nice garden with seating. Would you be willing to sponsor the school to help with some of the costs involved if the application is successful? To give the project more appeal to the Gawler Council for sustainable water use, I have also approached an specialised tank company (AUSDRAIN geo-modular tanks) and am trying to negotiate some form of sponsorship.

Kind Regards,

Adela King, Gawler & District College
