Improving Self Awareness of Mental Health Workshop

Discover practical strategies to build resilience and clarity in your life,
to be better equipped to navigate the demands of today!

[Click Here for Next Scheduled Workshop](#)

Mental health has gained a lot of talk lately, and for good reason, it is an important topic that, to some degree, affects us all. It's important to have the right understanding and strategies to remain in control and not allow life's demands and pressures get on top of us.

Have you ever felt overwhelmed by things that demand your attention, both at home and in the workplace? Stressful situations, family demands, personal goals and values you want to uphold, expectations placed on you, or simply the bills piling up?

Stressors come in all forms, from many aspects of our life and affect us to varying degrees. Not all stress is bad, it's how we are equipped to identify and handle the stress and pressure that makes all the difference.

Aim for optimum wellbeing so you can thrive.

To gain a healthy state of mind and overall wellbeing, we need effective tools and

apply them to your circumstances.

- Develop a plan to proactively reduce or overcome negative mental health challenges

- Become aware of what circumstances and triggers affect your mental health, and put measures in place to diffuse their power from adversely affect your wellbeing.

Our aim is to empower you with the knowledge to identify circumstances and triggers that negatively affect you, and to provide you with strategies to help diffuse these stressors so they don't adversely affect your wellbeing both now and in the long term.

Who's this workshop for?

The workshop will benefit everyone. We all have demands that bring pressure on our life and bring about stress that can impact our behaviour, performance, physical health and attitude.

No one is immune to a state of mental unrest, it's a normal part of living, but it's how often we encounter this unrest and how we cope with these encounters that makes a difference.

When gone unrecognised or unchecked a stressful situation can escalate into a mental health crisis and ultimately has the potential to develop negative mental, physical and behavioural outcomes.

Awareness of these triggers and their impact is key.

Be empowered with the knowledge and strategies to optimise your mental wellbeing both now and into the future.

We will arm you with knowledge, tools and strategies, that when applied to your daily work and home life, will allow to you to optimise your mental wellbeing and help you to thrive.
